

The Tennessee Neurosurgical Society exists to represent the interests of all neurosurgeons in the state of Tennessee. Our goal is to provide for education and collegiality between members and to provide a cohesive voice representing the neurosurgical perspective in political and public forums for issues that affect our region.

Program Learning Objectives

Upon completion of this educational activity, participants should be able to:

- Implement best current treatment of intracranial vascular lesions
- Have a working algorithm for management of all traumatic brain injuries
- Articulate and implement current standard of care in spinal surgery with regards to diagnosis, initiation of treatment, and surgical techniques
- Discuss evolving medical/business/legislative issues in neurosurgery
- Discuss current best treatment of intracranial neoplasms
